

CADILLAC P1540: AIR CONDITIONING (A/C) REFRIGERANT OVERPRESSURE - AIR CONDITIONING (A/C) DISABLED

OVERVIEW

| | | |
|-----------------------------|---|------------------------------|
| Severity | : | Medium |
| DIY Difficulty Level | : | Intermediate |
| Repair Cost | : | \$80-\$250 |
| Can I Still Drive? | : | Yes (Short-term only) |

What Does The Cadillac P1540 Code Mean?

If DTC P1540 is stored as a history code it indicates that the DIM did receive a high A/C refrigerant pressure message from the PCM. This code could also be caused by an intermittent short to voltage on the sensor signal circuit.

What Are The Potential Causes Of The Cadillac P1540 Code?

Intermittent short to voltage on the sensor signal circuit
