

CADILLAC P1570: TRACTION CONTROL ACTIVE - CRUISE CONTROL DISABLED

OVERVIEW

Severity	:	Medium
DIY Difficulty Level	:	Intermediate
Repair Cost	:	\$75-\$200
Can I Still Drive?	:	Yes

What Does The Cadillac P1570 Code Mean?

Engine started; Cruise Control requested and engaged, and the PCM detected that the Traction Control System was enabled. The C/C module uses the Cruise Engage circuit to request Cruise Control. If improper conditions exist, the PCM will disable Cruise Control Module.

How Can You Fix The Cadillac P1570 Code?

- Verify that there are no ABS/TCS trouble codes in memory
- This trouble code is usually caused by conditions that cause traction control to activate during cruise control. Check with the customer to verify the conditions present when the code set.
