

CADILLAC U1096: LOSS OF COMMUNICATIONS WITH IPC

OVERVIEW

Severity	:	<div><div>Medium</div></div>
DIY Difficulty Level	:	<div><div>Intermediate</div></div>
Repair Cost	:	\$75-\$200
Can I Still Drive?	:	Yes

What Does The Cadillac U1096 Code Mean?

Conditions for Setting the DTC. The module does not receive a SOH message back from the instrument cluster. The module retries the request 3 times. The module then sets DTC U1096. This DTC only sets if [U1301](#) is not current.

What Are The Potential Causes Of The Cadillac U1096 Code?

- DTC U1096 does not normally represent a failure within the module.
- When loss of class 2 serial data communication DTCs (DTCs with a letter U prefix) are stored as history, know all of the possible serial data DTCs set in each module before diagnosis.
