

CADILLAC U1152: LOSS OF DATA HCM

OVERVIEW

Severity	:	Medium
DIY Difficulty Level	:	Intermediate
Repair Cost	:	\$75-\$200
Can I Still Drive?	:	Yes

What Does The Cadillac U1152 Code Mean?

Conditions for Setting the DTC. The module does not receive a SOH message back from the heater and A/C programmer. The module retries the request 3 times, and then sets DTC U1152. This DTC only sets if U1300 or U1301 are not current.

- DTC U1152 does not normally represent a failure within the module.
- When loss of class 2 serial data communication DTCs (DTCs with a letter U prefix) are stored as history, know all of the possible serial data DTCs set in each module before diagnostic.
