

CADILLAC U1716: DDM COMMUNICATION ERROR

OVERVIEW

Severity	:	<div><div>Medium</div></div>
DIY Difficulty Level	:	<div><div>Intermediate</div></div>
Repair Cost	:	\$75-\$200
Can I Still Drive?	:	Yes

What Does The Cadillac U1716 Code Mean?

The door modules must be powered and can not have B1327-Battery Voltage Low or B1328-Battery Voltage High set for this DTC to set.

When DTC U1714 is set, a failure of the power window low speed serial data circuit is the probable cause. However, DTC U1714 may also be set if the window sensor has lost power, a condition that may be caused by a failure of the sensor battery voltage circuit.
