

CHRYSLER B103E: REAR MODE DOOR TRAVEL RANGE TOO SMALL

OVERVIEW

Severity	:	<div><div>Medium</div></div>
DIY Difficulty Level	:	<div><div>Intermediate</div></div>
Repair Cost	:	\$250-\$350
Can I Still Drive?	:	Yes

What Does The Chrysler B103E Code Mean?

The rear mode and temperature blend doors are controlled by a two wire actuator. The door actuator motor will rotate either clockwise or counter clockwise by reversing the polarity of the circuits depending on the command from the controller. The A/C Heater Control monitors the circuits for proper operation and will set a Diagnostic Trouble Code (DTC) if a fault is detected. For further information (Refer to Heating and Air Conditioning/Controls/ACTUATOR, Mode Door – Operation).

What Are The Potential Causes Of The Chrysler B103E Code?

- Rear Mode Door Binding
- Rear Mode Door Actuator
- A/C Heater Control
