

CHRYSLER B21FB: IGNITION FOBIK REMOVAL INHIBIT UNLOCK

OVERVIEW

Severity	:	Medium
DIY Difficulty Level	:	Intermediate
Repair Cost	:	\$250-\$400
Can I Still Drive?	:	Yes (Short-term only)

What Does The Chrysler B21FB Code Mean?

The Wireless Ignition Node (WIN) detects an internal problem in the module. The WIN performs an internal self test on the Key Lock Solenoid circuit. The purpose of the internal Key Lock Solenoid is to prohibit the FOBIK from being removed from the module if the shifter is in any other position other than Park.

The repair of this fault condition does not involve any external circuitry and centers on verifying the integrity of the internal circuitry and software validity.

What Are The Potential Causes Of The Chrysler B21FB Code?

Wireless Ignition Node (Win)
