Can I Still Drive?	:	Yes

What Does The Chrysler B2329 Code Mean?

With the ignition on. Each optical track (received value) is monitored once a second while the rain sensor is active (WK Intermittent 1-5, LX intermittent 1-6) and compared to a small value. The optical track value must be below this value for 4 minutes (checked once per second) before this DTC will be set. Once the DTC is set, the optical track must be above the threshold for 4 minutes (checked once per second) before the DTC is cleared

What Are The Potential Causes Of The Chrysler B2329 Code?

RAIN SENSING MODULE
