What Does The Chrysler C124C Code Mean?

This DTC runs continuously monitored with the engine running and the Adaptive Cruise Control (ACC) Module in normal mode. An active Diagnostic Trouble Code (DTC) is stored in the Anti-Lock Brake System (ABS). The ACC module will disable the ACC system and the ACC UNAVAILABLE message will display in the Cabin Compartment Node (CCN). Once the DTC goes to stored, the ACC system will return to normal operation. The DTC will be cleared after the ACC Module sees 100 consecutive key cycles of the stored DTC.

What Are The Potential Causes Of The Chrysler C124C Code?

ESP System DTC present
