

DODGE C2128: ECU RESET/RECOVERY OCCURED

OVERVIEW

Severity	:	High
DIY Difficulty Level	:	Advanced
Repair Cost	:	\$750-\$850
Can I Still Drive?	:	No

What Does The Dodge C2128 Code Mean?

Once at each ignition cycle. When the ignition is turned on, the Electro-Hydraulic Power Steering (EHPS) Module checks to see if the last shutdown occurred correctly. If it did not, this DTC will be set active for the remainder of the current key cycle. The EHPS Pump will run normally even if this DTC is active.

What Are The Potential Causes Of The Dodge C2128 Code?

- (A11) fused b(+) circuit open or high resistance
- (z935) ground circuit open or high resistance
- Electro-hydraulic power steering (EHPS) pump
