

# Dodge P1D93: Incorrect Gear Ratio Clutch 5 Defective

## OVERVIEW

Severity

:

High

DIY Difficulty Level

:

Advanced

Repair Cost

:

\$350-\$3000

Can I Still Drive?

:

No

## What Does The Dodge P1D93 Code Mean?

The Transmission Control Module (TCM) monitors for conditions which lead to an unexpected transmission gear ratio (e.g. slipping clutches, hydraulic or mechanical defects, etc.). The TCM compares the actual gear ratio (i.e. the ratio of input speed to output speed) to a minimum and maximum calibrated gear ratio value. The TCM performs this comparison while driving in a fixed gear, during gear engagement, and during shifting from one gear to another.

## What Are The Potential Causes Of The Dodge P1D93 Code?

Transmission - Internal Components
