

## VOLKSWAGEN P1847: PLEASE CHECK DTC MEMORY OF BRAKE SYSTEM ECU

### OVERVIEW

Severity	:	<div><div></div></div> High
DIY Difficulty Level	:	<div><div>Intermediate</div></div>
Repair Cost	:	\$150-\$400
Can I Still Drive?	:	No

### What Does The Volkswagen P1847 Code Mean?

The ECU detected a memory fault of the brake system. The Engine Control Module (ECM) communicates with all databus-capable control modules via a CAN databus. These databus-capable control modules are connected via two data bus wires which are twisted together.

### How Can You Fix The Volkswagen P1847 Code?

- Fuses on E-box in engine compartment, left side, may be faulty
- Check harness connector for contact corrosion or water damage
- Check resistance of solenoid valves may not be up to specification
- Solenoid valve may be faulty
- Wires to Transmission
